

Heritage Assessment:

All rural pipeline projects, subdivisions, lagoons and projects with an areal impact will need to have an initial review called a Heritage Resource Review (HRR). This will determine if a broader Heritage Resource Impact Assessment (HRIA) is necessary. Areal impact is simply an impact over an area that potentially has heritage issues (i.e. a lagoon expansion requires a HRR but adding an extra filter inside an existing treatment plant does not require a HRR.) HRRs must be performed as early in the project as possible, often prior to submitting this application to Environment. If you wish a ruling on whether your water and sewer project needs a HRR, please contact the Drinking Water Quality Section of Environment at (306) 787-6517 and ask to speak to an Approvals Engineer. If your project needs a HRR, please complete and forward the Heritage Resource Review Referral Form – Water and Sewer Works Form available on the internet

(<http://www.tpcs.gov.sk.ca/HeritageReviewForms>) along with a single-page basic site plan to Archaeological Resource Management, Ministry of Tourism Parks, Culture and Sport, 9th Floor 1919 Saskatchewan Drive, Saskatchewan, S4P 4H2. Fax (306) 787-0069 or Telephone (306) 787-8157 / 787-5774 / 787-2848 / 787-5753.

Please select from the following;

- this project requires a Heritage Resource Review (HRR)
- the Heritage Resource Review (HRR) is underway, results will be faxed to (306) 787-0197
- the Heritage Resource Review (HRR) results are attached
- this project requires a Heritage Resource Impact Assessment (HRIA)
- the Heritage Resource Impact Assessment (HRIA) results are attached

First Nations and Metis Consultations:

Consultation must take place before any project or other activity that could adversely affect Treaty or Aboriginal rights is developed or put in place. The proponent must start the Consultation as early in the project development process as possible; we advise suitable time must be allotted if a Consultation is needed. To determine whether your project needs a Consultation with First Nations and Métis People, to determine the content and scope and scale of the Consultation, or if you have any other questions regarding Consultation please contact the Drinking Water Quality Section of Environment at (306) 787-6517 and ask to speak to an Approvals Engineer. Proponents undertaking Consultation will typically be required to perform information sharing and issue identification and adjustments and reporting to Environment. If you have contact with another provincial ministry before you have contacted Environment, ask that ministry to conduct any required Consultation. If Consultation has been or is being done with another agency please indicate below, as only one Consultation is typically required. Further information is available in the publication *Government of Saskatchewan Interim Guide for Consultation with First Nations and Métis People*, January 2008 (<http://www.fnmr.gov.sk.ca/documents/policy/consultguide.pdf>online).

Please select from the following;

- Environment indicates this project requires a First Nation and Metis Consultation
- a First Nation and Metis Consultation is being considered by another agency
- a First Nation and Metis Consultation has been completed by another agency
- the First Nation and Metis Consultation results are attached
- Environment indicates the First Nation and Metis Consultation is completed

I/We certify that the information contained in this application is complete and accurate.
