Operator Certification Exam Schedules

Saskatchewan Institute of Applied Science and Technology (SIAST), in cooperation with external agencies (such as the Saskatchewan Water and Wastewater Association, Saskatchewan's regional colleges, the Assembly of First Nations and private trainers), is organizing timely and suitable locations for exam sittings for individuals to certify as water and wastewater systems operators. <http://www.siastr.sk.ca/operatorexamsittings/>

Examinations – Need to Know Criteria

Association of Board of Certification (ABC)
<http://www.abccert.org/examinformation>

Saskatchewan uses criteria established by the ABC. These criteria describe the core competencies that an operator requires to perform the most critical task in the areas of water treatment, distribution, wastewater treatment, collection and small water systems. The core competencies are covered in the Saskatchewan operator certification examinations.
