

Precautionary Drinking Water Advisory (Do Not Use Notice)

This Advisory applies to residents and users of Cutbank Rural Pipeline Utility's water distribution system and is effective *immediately as of 11:00 a.m August 6, 2020.*

This Do Not Use Notice is issued due to the water possibly being contaminated with an unknown substance due to a break-in at the treatment facility.

An unknown substance may have been added to the drinking water supplied by the Cutbank Rural Pipeline Utility due to a recent break-in at the water treatment plant. The Water Security Agency and Cutbank Rural Pipeline Utility are advising all consumers to **NOT USE THE TAP WATER FOR ANY PURPOSES UNTIL FURTHER NOTICE.**

Consumers should do the following:

Do Not Use Your Tap Water. The Tap water may be contaminated with an unknown substance that is harmful by consumption, skin contact or inhalation (e.g. aerosols generated during showering) routes. Therefore, the water should not be used under any circumstances.

Do Not Drink Your Tap Water – Use Only Bottled Water. Bottled water or other source of known good quality water should be used for all drinking (including baby formula and juice), brushing teeth, washing dishes, making ice and food preparation.

Do Not Try and Treat the Water Yourself. Boiling, freezing, filtering, adding chlorine or other disinfectants, or letting the water stand will not make the water safe.

Optional: Potable water is available at the following location (Loreburn/Elbow)
Bring a clean water container.

This Advisory is effective on the date and time listed above and will not be lifted until the water supply is determined to be completely safe.
