

EMERGENCY BOIL WATER NOTICE

To all users of the
SPC-Poplar River Hygien
Effective July 15, 2020 and until further notice

Water from SPC-Poplar River Hygien supply and distribution system should be boiled, at a rolling boil, for at least one minute before using to ensure bacteriological safety. Those individuals not wishing to boil water should make use of an alternative water source that is known to be safe.

This Emergency Boil Water Notice also applies to any water which may enter a person's mouth, such as water used for tooth brushing, soaking false teeth and water put into food or drink which will not be subsequently heated. Since harmful bacteria may survive freezing, ice cubes should also be made from previously boiled water.

In addition to the above, all dishes and utensils should be soaked in a bleach water solution (approximately 2 tablespoons of bleach per gallon or 10 ml of bleach per litre of water) for at least two minutes after being washed to kill any bacteria which may be present.

➤ Do NOT mix bleach with soaps and detergents.

The Emergency Boil Water Notice remains in effect until further notice. If you require any additional information, please contact Public Health Inspection at 1-888-295-8005.
