May 15, 2008

Mr. Jeff Mander, Director of District Operations
SaskWater
200 – 111 Fairford Street East
MOOSE JAW, SK S6H 1C8

Dear Mr. Mander:

This letter is to advise you that a Precautionary Drinking Water Advisory (PDWA) will be placed on the SaskWater Saskatoon East and West Raw Water line(s), and is effective immediately until further notice. The West Raw Water Line will exclude the following: Cedar Villa Estates, The Village of Vanscoy, and the PCS Cory and Agrium Vanscoy Potash Mines (as these locations have their own approved waterworks).

This is to advise that the Ministry of Environment has reviewed information regarding the SaskWater Saskatoon East, and West Raw Water supply lines. The water treatment process is inadequate to ensure hygienic or potable water use.

In consultation with the Saskatoon Health Region, I would like to advise that the Ministry of Environment is issuing this PDWA for all users of the above mentioned water systems.

Therefore, I ask that the administration notify all users of the SaskWater Saskatoon East, and West Raw Water distribution systems, of the conditions in the attached Precautionary Drinking Water Advisory.

This Precautionary Drinking Water Advisory remains in effect until improvements are made to the water system which will ensure a safe supply at all times and meets Ministry of Environment's waterworks design and drinking water quality standards for human consumptive use.

Thank you for your cooperation in this regard. For further information please do not hesitate to contact the undersigned at 933-8367.

Sincerely,

Lee Reinhart
Environmental Project Officer
Ministry of Environment
Saskatoon, SK.
