

Saskatchewan Environment and Resource Management

has issued a

**Precautionary Drinking Water Advisory**

To all residents of Uranium City

effective immediately and until further notice.

**All water used for human consumption should be heated until it reaches a rolling boil for 3-5 minutes then store this water in a sanitized container until used.**

This boil water notice also applies to any water which may enter a person's mouth, such as water used for tooth brushing, soaking false teeth and water put into food or drink which will not be subsequently heated. Since harmful bacteria may survive freezing, ice cubes should also be made from previously boiled water.

In addition to the above, all dishes and utensils should be soaked in a bleach water solution (approximately 2 tablespoons of bleach per gallon or 10 ml of bleach per litre of water) for at least two minutes after being washed to kill any bacteria which may be present.

(Do Not mix bleach with soaps or detergents)
